SUMMARY

Offensive Security Professional with 6+ years of expertise in cybersecurity, penetration testing, and vulnerability management. Demonstrated proficiency with industry-standard tools including Burp Suite, OWASP ZAP, Nmap, and SIEM solutions. Specialized in risk mitigation, incident response, cloud security, and API penetration testing. Experienced in identifying and remediating OWASP Top 10 vulnerabilities, conducting web and mobile application security assessments, and safeguarding Fortune 500 organizations against emerging threats.

PROFESSIONAL EXPERIENCE

Penetration Tester

Dec 2024 - Present

Yogosha

- Performed penetration tests aligned with NIST, MITRE ATT&CK, and CIS benchmarks.
- Delivered detailed vulnerability reports with actionable recommendations for mitigation.
- Assisted clients in strengthening their security posture through meticulous testing and strategic advisory.

Bug Bounty Hunter

Jan 2018 - Present

Hackerone and Independent Programs

- Specialized in identifying and mitigating vulnerabilities aligned with the OWASP Top 10 standards.
- Successfully identified and reported 150+ security vulnerabilities across 50+ platforms.
- Acknowledged in several Bug Bounty Hall of Fames for responsible disclosures.

Pentester Internship

June 2024 - July 2024

CFSS

- Collaborated with a security team to conduct penetration tests on critical infrastructure.
- Gained hands-on experience in real-world pentesting environments, with a focus on teamwork and cross-functional communication.
- Contributed to improving the security frameworks of clients while maintaining a high standard of report documentation.

TECHNICAL SKILLS

Tools

- Penetration testing and Exploitation:** Burp Suite, Nmap, Metasploit, Tenable Nessus, Acunetix, Splunk (SIEM).
- Password Cracking & Enumeration:** John the Ripper, Hydra, Aircrack-ng, Bloodhound, hashcat
- Windows AD Exploitation:** smbclient, kerbrute, Evil-WinRM, netexec, impacket, crackmapexec
- Others:** Experience with SIEM tools like Splunk for threat detection, log analysis, API and network pentesting.

Additional Skills

- Bug Bounty Hunting:** Expertise in identifying and reporting security vulnerabilities.
- CTF Player:** Active participant in Capture the Flag challenges, specialising in web exploitation and privilege escalation.
- Web Application Pentesting:** Proficient in testing OWASP Top 10 vulnerabilities.
- API & Server Testing:** Hands-on experience with API penetration testing and server exploitation.
- Vulnerability Scanning:** Skilled in using automated scanners and manual testing techniques.
- Windows Active Directory:** Experienced in AD enumeration, attack strategies, and securing AD environments.
- Operating Systems:** Proficient in Kali Linux, Arch Linux, Debian-based distributions, and Windows.

Coding Languages

- Proficient:** Python, Bash, PHP, MySQL, HTML, JavaScript, CSS.
- Basics:** Familiar with other fundamental programming languages and frameworks.

Languages

- | | |
|-------------------|---------------------------|
| • Bangla: | Native (Mother Tongue) |
| • English: | Fluent (Read/Write/Speak) |
| • Hindi: | Fluent (Read/Write/Speak) |
| • Urdu: | Conversational (Speaking) |

PROJECTS

- Created Pentester Guide.** A Comprehensive Resource for Pentesters: Tools, Methodologies, Scripts, Certifications, Learning Resources, Labs, Career Opportunities, Entertainment, and Freelancing. ([Read it here](#))
- Developed Burp Proxy Toggle Addon.** A lightweight, open-source script for one-click Burp Suite proxy toggling, minimizing RAM usage. Trusted by 500+ security professionals. ([Try it Here](#))

- **Coded Hackify.** An open-source Bash script for Debian-based systems, enabling quick installation of pentesting tools and wordlists with a single command. Perfect for streamlining setups. ([Try it here](#))
- **Wrote Cyber Security Write Ups.** Infosec Writeups features detailed Bug Bounty, HTB, and TryHackMe solutions, offering clear steps and insights into solving challenges and finding vulnerabilities. ([Read it here](#))
- **Designed and Developed CyberTerminus.** A sleek, hacker-inspired dark Firefox theme with vibrant neon highlights, offering high contrast and a terminal-like feel. Perfect for coders, ethical hackers, and cyberpunk enthusiasts. ([Try it here](#))

HALL OF FAME

Acknowledged 20+ times in Hall of Fames. Some of them mentioned below,

- Google Honorable Mentions
- Oracle
- AOL
- Mail.ru
- XiaoMi
- ECCouncil, Bug Bounty
- ECCouncil, Cyber Challenge
- NCIIPC, Govt of India
- ZOHO
- Shaadi.com
- GeeksForGeeks
- PostNL
- EUR.nl
- Visenze
- Finefriends
- Hively

CERTIFICATIONS

Cyber Security

- CW Labs CRTA (Certified Red Team Analyst)
- CW Labs C3SL (Certified Cyber Security Analyst)
- EC-Council Ethical Hacking Essentials
- Peritus Training School Burp Suite Mastery

Bug Bounty Acknowledgement Certificates

- ECCouncil Bug Submission Certificate
- PayTM Acknowledgment Certificate
- GeeksForGeek Acknowledgment Certificate
- Shaadi.com Acknowledgment Certificate

Coding Certifications

- **Sololearn**
 - Python
 - JAVA
 - PHP
 - HTML
 - CSS
 - JQuery
- **Codecademy**
 - Python2
 - GIT
- **Ardent**
 - Android App Development

EDUCATION

Bachelor of Technology

May 2011 - May 2015

MAKAUT, WB

- Completed Android App Development by Ardent (2013)
- Completed Soft Skill Training Program by National Skill Development Corporation (2015)
